About me

I am a dedicated developer with a passion for building apps and websites.

Recently completing a 16-week coding Bootcamp at Makers.com, I am now seeking employment opportunities to further advance my skills and portfolio.

I am particularly focused on expanding my knowledge of design principles and exploring new and exciting areas of development. My recent project involved working with deployment, GO, React.js, and CSS. I am currently working on a number of personal projects, including a React memory game and about to start a collaborative project with a friend who asked for my help to create an interactive story-driven 8-bit game.

Makers Academy Bootcamp

Full stack software development/ 16-week Bootcamp

- Using agile principles to work effectively in a team including daily standups, retros, breaking work into smaller tasks and sprint planning using a Kanban framework
- Pair programming on a daily basis
- Getting feedback on my coding process via code reviews with coaches/fellow students
- Understanding the fundamentals of object-oriented languages
- Ability to write clear, simple, test-driven code
- Interpreting project briefs, creating user stories, defining MVPs
- Using GitHub for version control on group projects
- Participated in group projects, honing my ability to work effectively in a team and effectively present my work to others

Tech Skills: JavaScript, React.js, Node.js, Express, Jest, Cypress, HTML, SCSS, CSS, Ruby, Sinatra,RSpec

Experience

St George's Hospital / Data Manager for Renal, Haematology and Oncology

TOOTING, LONDON

- Seconded as Data Manager for Renal, Haematology, Oncology, and Palliative care for a 15-month placement in 2020 (extended from an originally planned 3-month placement)
- Managed a team of four junior data managers and was responsible for analyzing spend and activity data, identifying causes for income loss, and implementing new workflows when needed
- Produced several reports, including a Service Update Report which provided a snapshot of the current financial position, analyzed variances in income and activity, and was used to make key decisions within the department
- Managed several suppliers, serving as the primary point of contact for payment-related issues
- Approved, queried, and receipted invoices, monitored spend for increases or discrepancies, and met regularly with finance teams to discuss accounts and service as a whole
- Oversaw data for a department with an annual budget of over £57.5m
- Produced other reports on a monthly, weekly or ad-hoc basis. Reports focused on subjects such as high-cost episodes, supplier spend estimates, and performance of high-income activity such as bone marrow transplants, chemotherapy, kidney transplants, and blood clotting factors

St George's Hospital / Oncology Medical Secretary

TOOTING, LONDON

- Interacted with a diverse range of professionals on a regular basis, including doctors, service managers, and pharmaceutical representatives
- Developed strong communication and relationship-building skills, including the ability to navigate technical medical terminology and convey information clearly and effectively
- Built and maintained positive relationships with patients
- Utilized technical skills to provide accurate and efficient support to medical staff
- Assisted with audits and created infographics
- Implemented several new workflows for the department

Various/ Guitar Teacher

PRESENT

Volunteering in local community gardens and teaching privately one-to-one.

Remap (Charity) / Volunteer(maker)

Being able to collaborate with fellow makers and designers has been a pure joy and being able to lead projects that have aided our disabled users has been beyond rewarding and raised both my confidence and devotion to my work.

In my time there, I have been able to explore areas I had little or no expertise such as; Digital Sculpting, 3D Printing, 3D Object Mapping and hands-on product manufacture.

<https://www.remap.org.uk/> *Remap custom-makes equipment to help disabled people live more independent lives.*

Skills

Software

- JavaScript, React.js, Node.js, Express, Jest, Cypress
- Ruby, Sinatra,RSpec
- HTML, SCSS, CSS
- Tailwind, Bootstrap
- SQL, Postgres Excel

Data Analysis

- Creating department performance reports
- Tracking income and performance
- Dashboard creation
- Audits and data validation
- Strong experience in Excel, including writing DAX measures
- Familiar with SQL and Tableau

Finance

- Creating accruals and financial estimates
- Managing several NHS suppliers
- Paying invoices
- Tracking contract/SLA expiry dates
- Raising PO numbers
- Reporting on changes in spend and performance

Management

- Line managing multiple staff in different departments
- Performing yearly appraisals and target setting
- Managing long-term absences
- Overseeing the development of new training programmes

Education

Bournemouth University/ Industrial Design (2:1)

Croydon College / Graphic Design BTEC ND (D,D,M)

St Dunstan's College 10 GCSEs

Hobbies and interests

Coding: My newest hobby. Already have a few projects with friends complete and have quite a few more in the pipeline

Music: Played with several jam bands and love getting together in the summer for a campfire sing-along. Love recording music and coming up with ideas

Cooking: My happy place

Climbing: My favourite sport, but hate the shoes!
